

# The Book

Cultures Creates Deserts

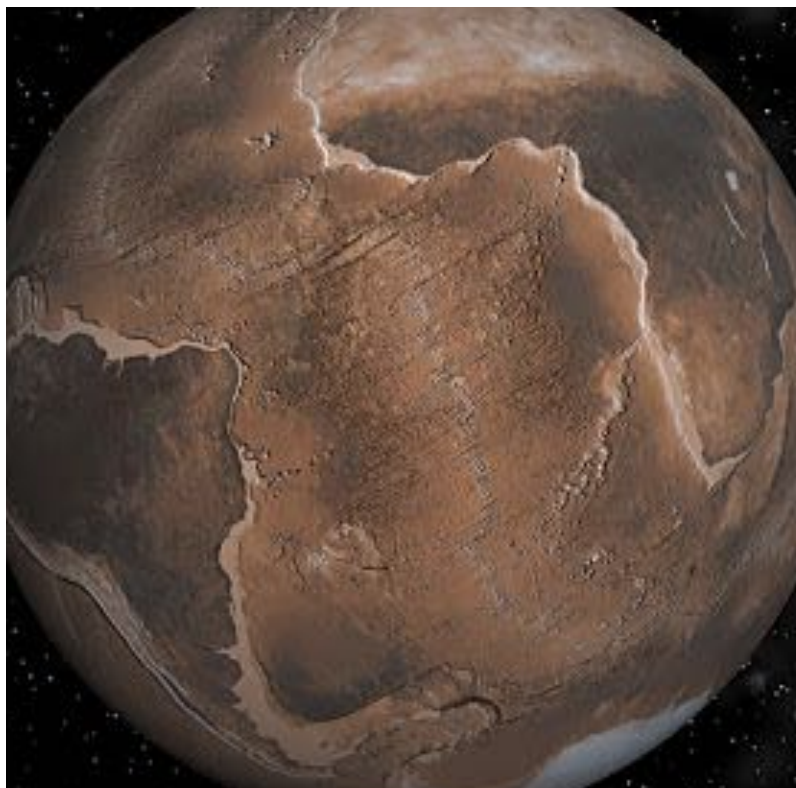

# The tree

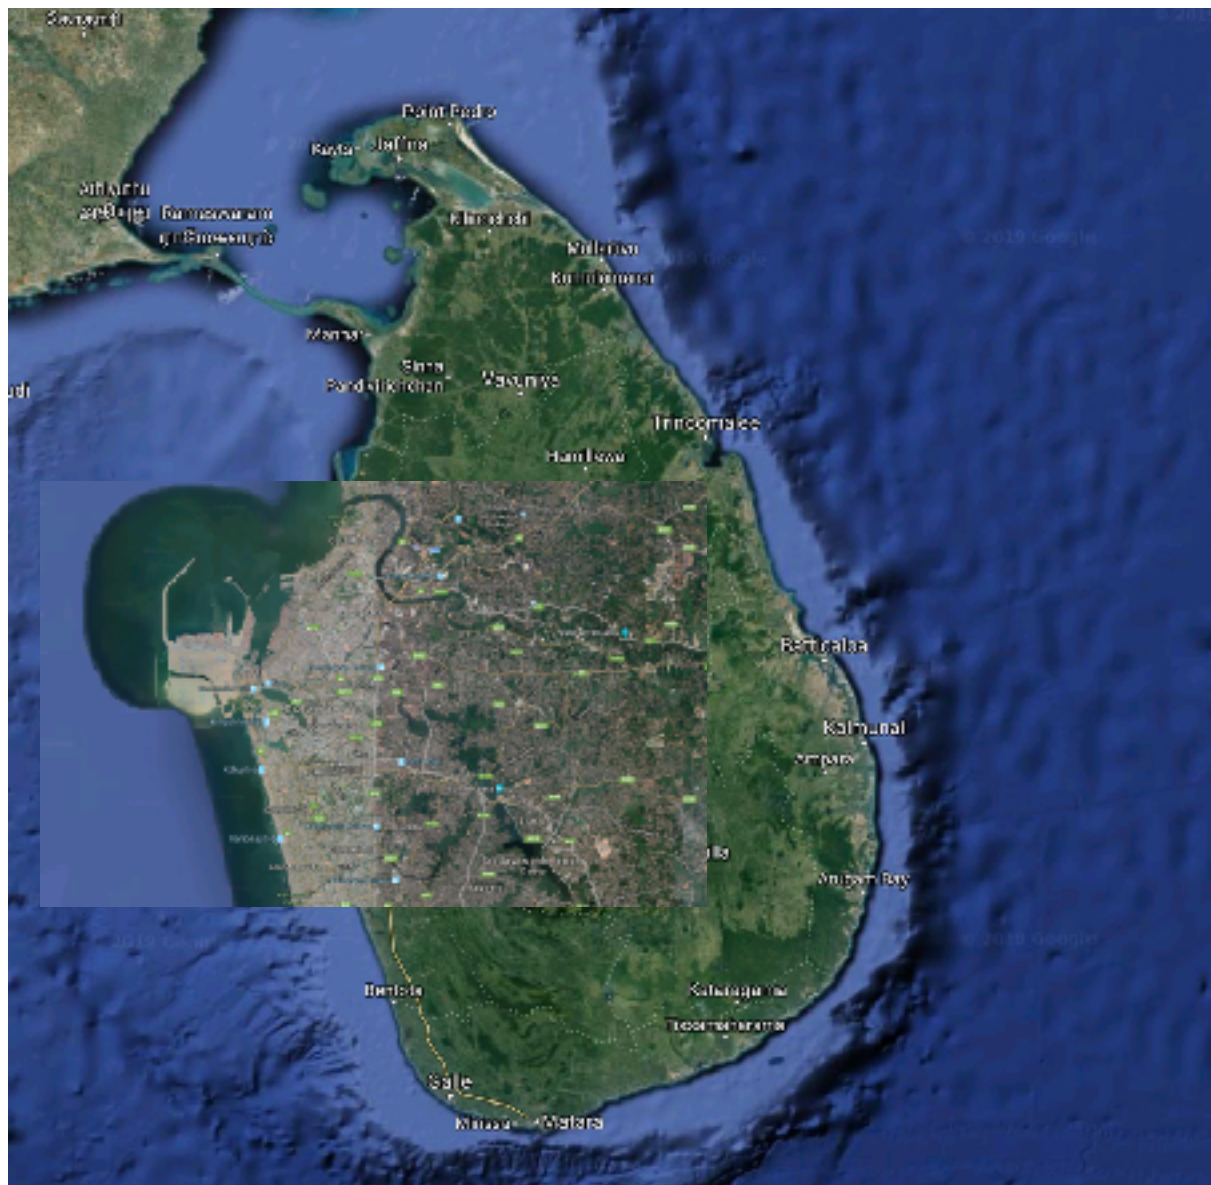

## Where is it?

It is a bold claim that cultures are responsible for the desert. A great culture leaves behind a great desert. We have been clearing forests for our benefits for longer than we would like to admit. Now it happens for financial profit in daylight. When the forests and trees are gone its for good. Once it's gone it's all gone, nothing else can matter.

There are natural deserts or fantastic dunes but that is not what we see here.

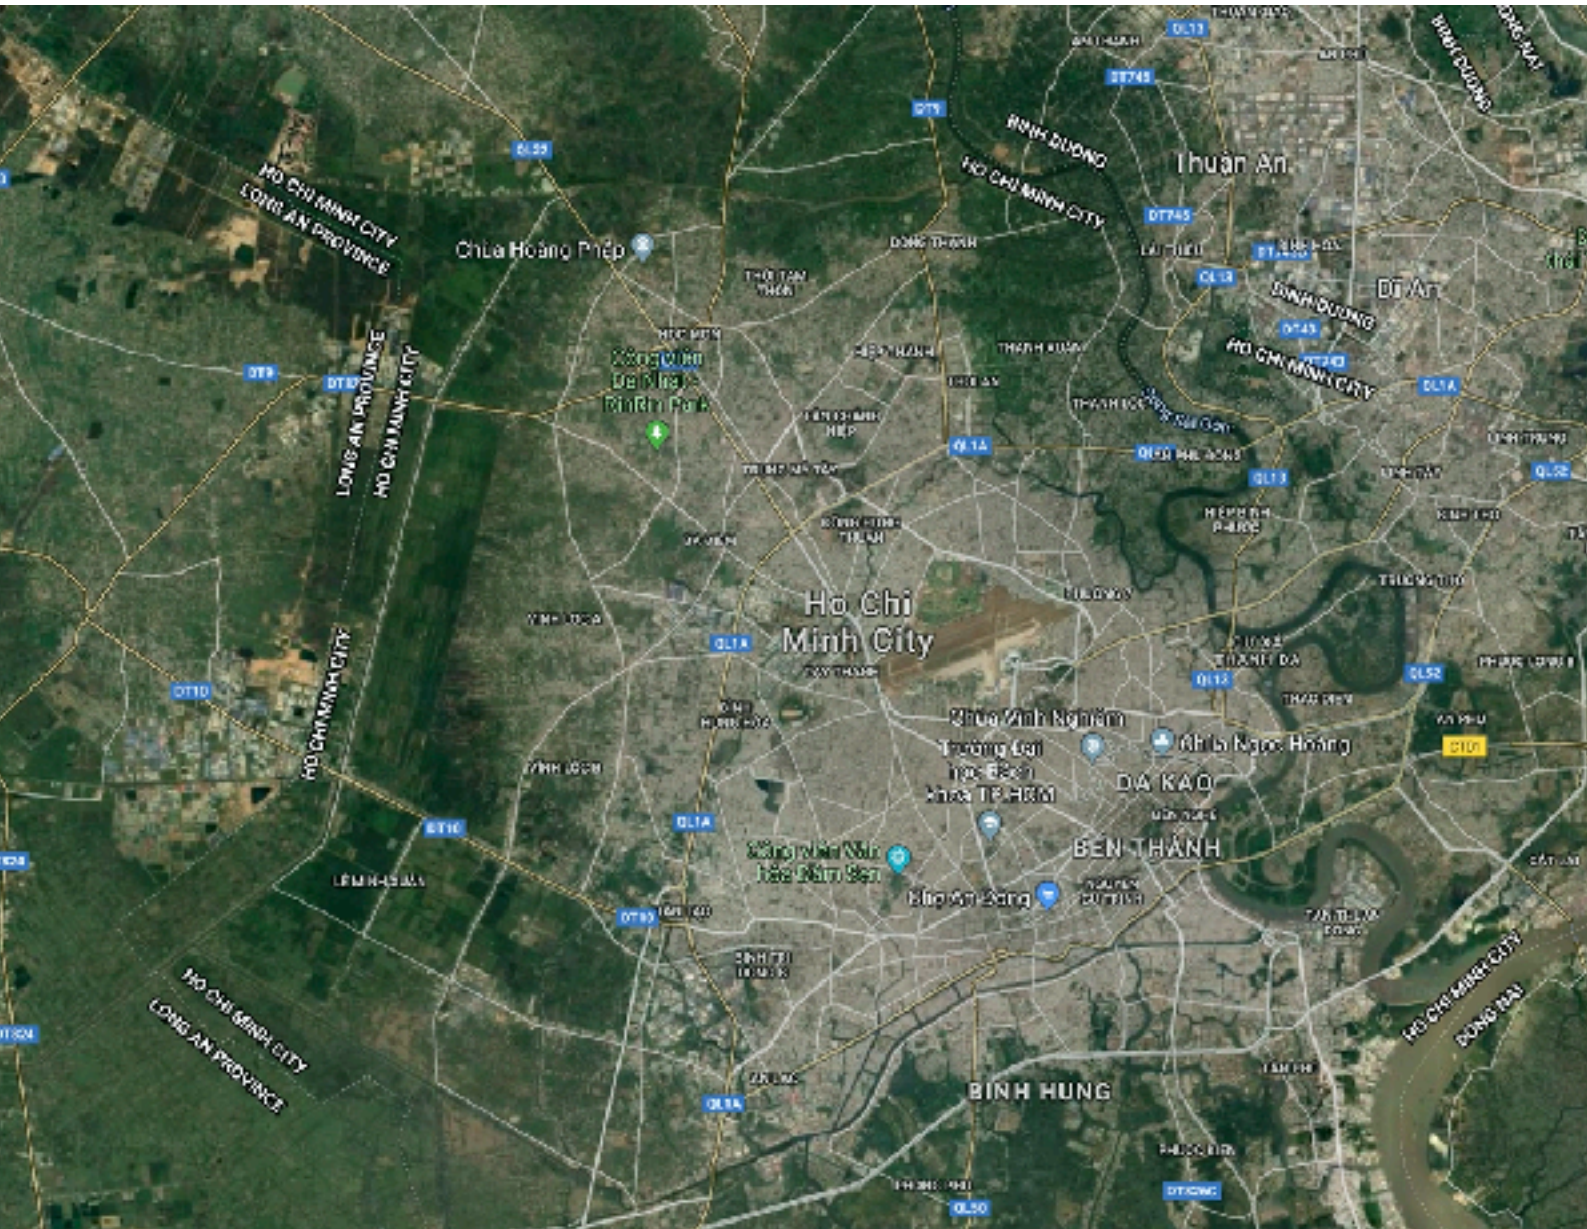

Paradise, Sri Lanka most travelers, people walking on the street will agree that it is a green peering country with many trees. There are only a few pockets of natural forests. In the past, this Island had a brilliant water management system that is responsible for its rich biodiversity but today its a paradise on its way to a desert.

What do you expect the Silk Road to look like on an aerial map?  
Where are the forests?

Vietnam HCMC a tropical forests practically deforested in the last 20 years. Which is essentially the case on a global scale today.

We know about the great Biblical cultures and their location. If culture creates deserts we can expect such places to be a desert. Which is what all cities will leave behind - arid land. Where were these Biblical cultures located?

African culture is as old as the modern man's migrating starting point. Africa losing its tropical forests to culture.

Once upon a time, Ethiopia had a rich culture, religion, and history. Today it reminds us of famine. Where are the trees?

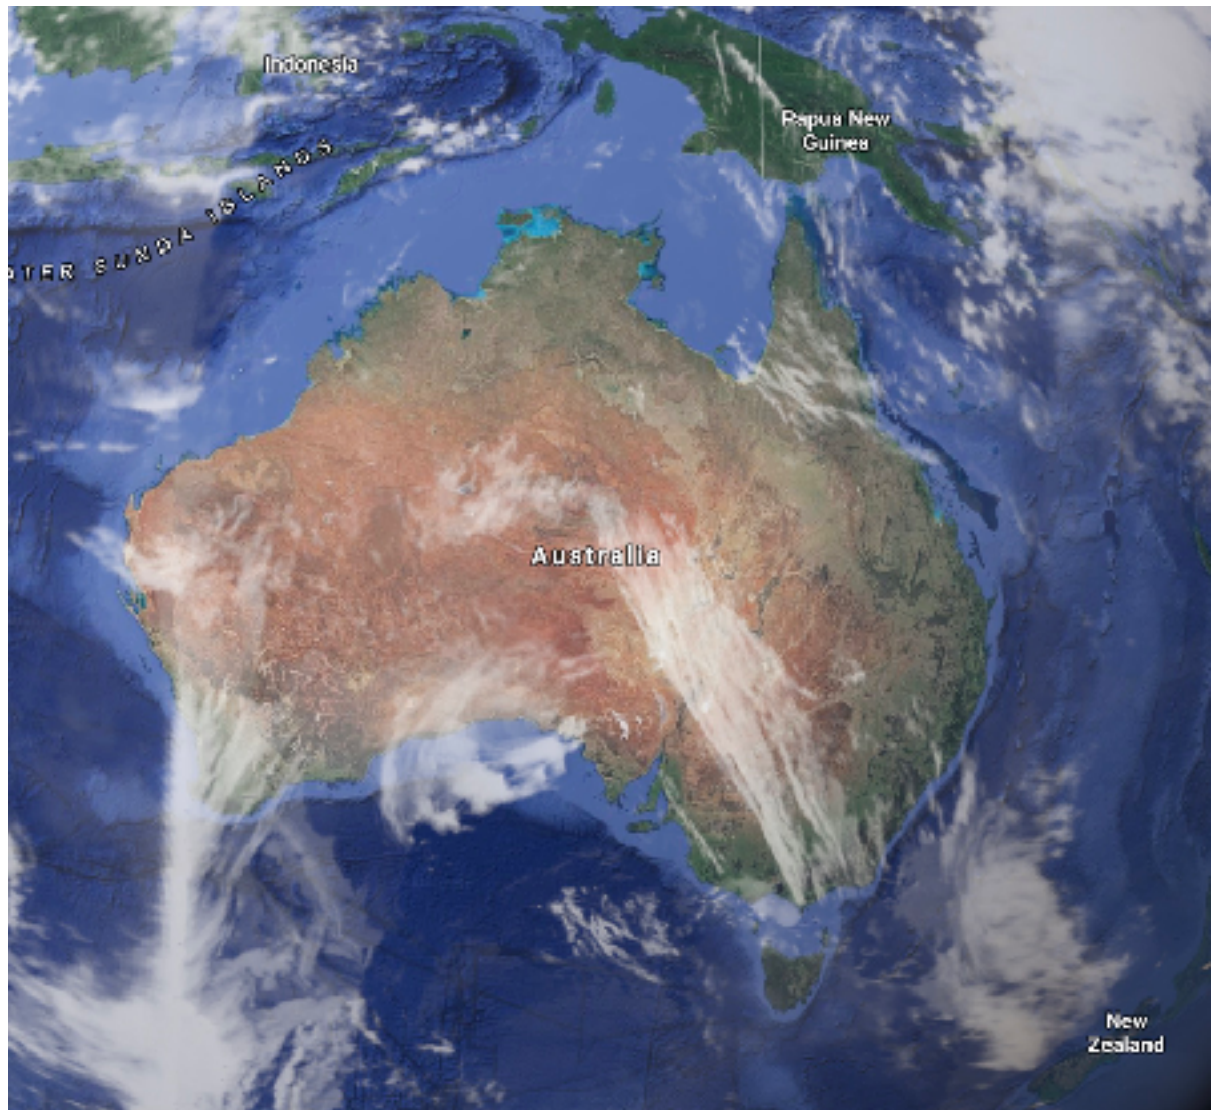

If it's true that culture creates a desert. Then if you knew or not where the culture of the Inca Empire was you will expect to find a desert there today.

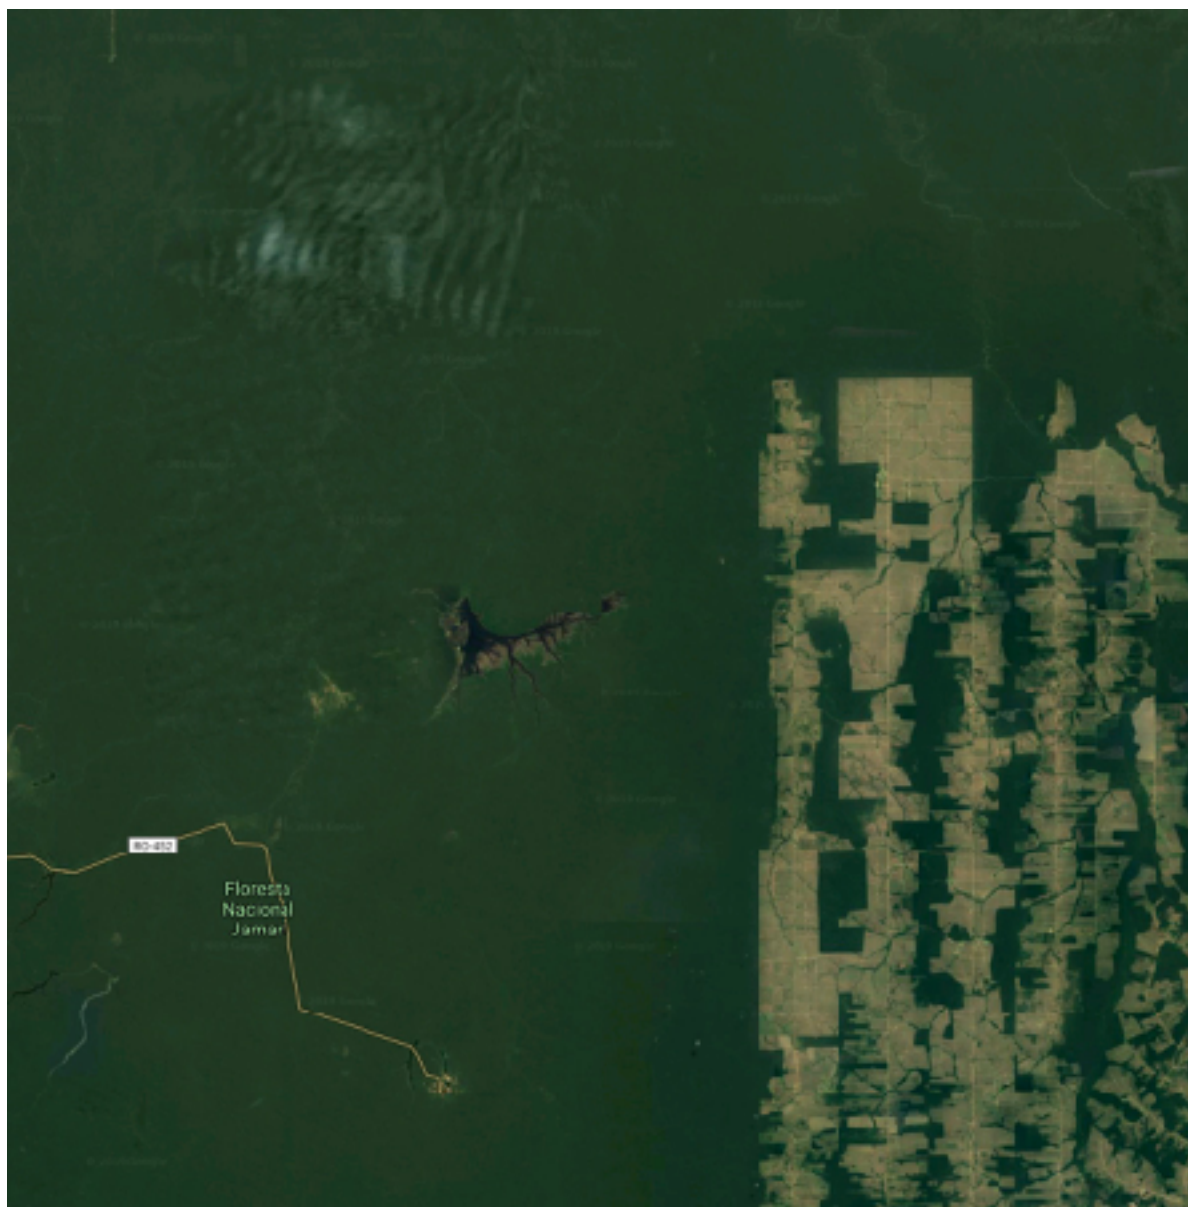

If it's true, culture/civilization creates a desert we should find more desert where the great civilization of the indigenous peoples of Arizona and Mexico, Native Americans lived before the Colonial era.

Australia is the surprise with a culture older than you can imagine, once part of the single Pangaea continent. It's the Ark of Noah.

This is the State of the Amazonas today. To lose the forests is to lose everything.

If a picture is worth a thousand words. This picture of New York tells the storey of New York not being mangrove forests.

## Where is it?

What is it? We call it mother earth, god or the living chemistry unexplained. It's tangible, not an intangible belief. It's our intelligence, it is more clear and manifesting for all to see but have we learned it too late. The message is simple. With or without humans it will go on but how short of a fuse do humans want on Planet Earth.

Nature has shown this. The artist PattO and his art, nature does not give a care. They will be recycled. I am hopping mad the hardest part has been using refined language to explain a simple idea.

Nothing is mine - meaning I don't claim copyrights, nor is there an I here. So that brings me to thank culture and Google Maps. Which without the two I would never make this bold claim that human culture creates a desert.

Fortunately or unfortunately, people like Bill Gates with all their might spend hundreds of millions looking for a cure for malaria but not a dime on planting a tree. Everybody wants to be the next Bill Gates, Einstein or Jobs. Never plant a tree.

### Q&A

How many birthdays have you celebrated?

How many trees have you helped plant?

Shouldn't cultured humans even enjoy planting trees?
